

Foundation Awards 30 Scholarships

GREETING NEWLY-elected LEC District Representatives at a turnover meeting recently, Executive Vice President F. E. Griffin explains the workings of the company's elective system and mentions the responsibilities of the representatives.

SALUDANDO E Representantenan di Distrito noho eligi na un reunion di cambio recientemente, Vice Presidente Ehecutivo F. E. Griffin la splica operacion di e sistema electoral di compania y la menciona responsabilidad di e representantenan.

Study in Holland, U. S. Made Possible By Lago Grants

The Lago Scholarship Foundation this week announced the names of 30 Aruba youths who have received either new grants or renewals to last year's grants to allow them to continue higher education in Holland and the United States. Sixteen are receiving Foundation help for the first time, 14 students had grants renewed.

The Foundation was established last year by Lago Oil & Transport Co., Ltd., as a means of financing education to eligible youths in Aruba. Some forty grants were awarded in the Foundation's first year.

New students receiving Foundation aid for the 1958-59 school year, their school and planned course of study are: Raphael Hodge, Howard University, civil engineering; Mario Croes, Spring Hill College, chemistry; Sixto Feliciano, Oklahoma A. & M., architecture; Caspar Boekhoudt, Fairleigh-Dickinson, business administration; Hornwah Hoo, University of Texas, mechanical engineering; Marvin Dupersoy, Kansas State University, civil engineering; Placidio van der Linden, Kansas State University, mechanical engineering; Chester McRoy Euton, Howard University, electrical engineering; Mario Hanson, Fresno State College, mechanical engineering; Hendrik Bareno, Fairleigh Dickinson, electrical engineering; James Bailey, Kansas State University, electrical engineering; and Patricio Ras, Bowling Green University, accounting.

Renewals for further studies this year were made to Alexander Hoo, Illinois Institute of Technology, chemical engineering; Angel Britten, Catholic University of America, mechanical engineering; Marcelino Kock, Rensselaer Polytechnic Institute, electrical engineering; Kok Tai Wong, Villanova University, electrical engineering; Rosindo Geerman, University of Vermont, professional chemistry; Alfonso Steenen, Pratt Institute, mechanical engineering; Ascisclo Martinus, West Virginia Institute of Technology, civil engineering; Parker Lake, Howard University, electrical engineering; Edwin Supriana, Kansas State University, architectural engineering; Calvin Romney, Howard University, civil engineering.

New grant-winners who will be studying in Holland are Miss Maria Croes and Miss Walja Harewood, both taking teacher training in Kweekschool, Reuver; Hugo Sharpe, studying chemical engineering in HTS, Dordrecht; and Andreas Bergen, mechanical engineering, HTS, Arnhem.

Renewed grants for class work in Holland have gone to August Tjin Kam Jet, HTS, Breda; Miss Indrani Beharry-Lall, optometry, Christian Huygenschool, and Miss Berbice Phillips, studying teaching at the Huygenschool; Miss Bernice Phillips, studying teaching at the Kweekschool, Reuver; and Miss Iris G. Wever, studying teaching at Kweekschool, Nijmegen.

According to the rules of the Foundation, staff and regular employees, their children, children of deceased employees or annuitants, or children born in Aruba of Aruban parents who have received the majority of their education in Aruba, are all eligible to apply for educational aid. The Training Division of the Industrial Relations Department administers the applications for the Foundation's Board of Administration. F. C. Donovan, Lago's superintendent of staff and services, is chairman of the Board.

This is only a partial list of grant-winners. Other cases, both new and renewals, are still pending.

Na U. S. y Holanda

Foundation a Otorga Beca Pa Studio Mas Halto

E siman aki Lago Scholarship Foundation a anuncia nombrenan di 30 hobennan di Aruba kende a recibi sea subsidio nobo of renobacion di e subsidio di anja pasá pa permiti nan sigui educacion avanza na Estados Unidos y Holanda. Diez-seis ta recibi yudanza pa di promer vez; e subsidio di 14 a worde renobá.

E fondo a worde estableci anja pasá door di Lago Oil & Transport Co., Ltd., como un medio pa financiar educacion di hubentud eligible na Aruba. Como cuarenta subsidio a worde duná den e promer anja di e fondo.

Studentenan nobo cu ta recibi subsidio di e Fondo pa anja escolar 1958-1959, y nan school y curso planea di estudio ta: Raphael Hodge, Howard University, civil engineering; Mario Croes, Spring Hill College, quimica; Sixto Feliciano, Oklahoma, A. & M., arquitectura; Caspar Boekhoudt, Fairleigh-Dickinson, business administration; Hornwah Hoo, University of Texas, mechanical engineering; Marvin Dupersoy, Kansas State University, mechanical engineering; Chester McRoy Euton, Howard University, electrical engineering; Mario Hanson, Fresno State College, mechanical engineering; Hendrik Bareno, Fairleigh-Dickinson, electrical engineering; y Patricio Ras, Bowling Green University, accounting.

NSC Contest Shows Lago Second

Slipping one place from its prize-winning performance of 1957, Lago stands second in the current National Safety Council Contest. The figures available include the year through April.

Lago's frequency rate as of the end of April was 1.18, slightly higher than Humble Oil & Refining Company's 1.14. Esso Standard Oil was third with 1.19, close behind Lago.

Among individual plants of Jersey affiliates, Esso Standard's Baton Rouge refinery was first with a rate of .43. Its nearest competitor among Jersey refineries in the same grouping (250,000 or more manhours monthly) was Humble's Baytown plant, with 1.15. Several smaller refineries had perfect records through April.

Last year, as is well-known by now, Lago won the NSC contest among larger refineries with a frequency rate of .61.

ward University, electrical engineering; Mario Hanson, Fresno State College, mechanical engineering; Hendrik Bareno, Fairleigh-Dickinson, electrical engineering; y Patricio Ras, Bowling Green University, accounting.

Renobacion pa estudio mas avanza e anja aki a worde otorga na Alexander Hoo, Illinois Institute of Technology, chemical engineering; Angel Britten, Catholic University of America, mechanical engineering; Marcelino Kock, Rensselaer Polytechnic Institute, electrical engineering; Kok Tai Wong, Villanova University, electrical engineering; Rosindo Geerman, University of Vermont, quimica profesional; Alfonso Steenen, Pratt Institute, mechanical engineering; Ascisclo Martinus, West Virginia Institute of Technology, civil engineering; Parker Lake, Howard University, electrical engineering; Edwin Supriana, Kansas State University, architectural engineering; y Calvin Romney, Howard University.

Segun reglanan di e Fondo, empleadonan staff y regular, nan yunan, yunan di empleadonan cu a fallece of anuitantenan, of yunan naci na Aruba di mayornan Arubano kende a recibi mayor parti di nan educacion na Aruba, ta eligible pa aplica pa yudanza den estudio. Training Division di Industrial Relations Department ta administra aplicacionnan pa e Fondo su Junta Administrativo. F. C. Donovan, superintendente di departamentonan di staff y servicio di Lago, ta presidente di e Junta.

Ganadornan nobo di subsidio kende lo ta studia na Holanda ta Srta. Maria Croes y Srta. Walja Harewood, tur dos tumando entrenamen-

(Continua na pagina 2)

Thode, Pomeroy Retired Aug. 1

A. J. Thode and L. A. Pomeroy, both of the Mechanical Department, retired Aug. 1 with more than 50 years of company service between them.

Mr. Thode, painter B, Mechanical Paint, has spent most of his 29 years-plus of service in that department, coming from the Labor Department in October, 1932. He worked as helper and tradesman before

A. L. Pomeroy A. J. Thode

becoming a painter in 1936.

Mr. Pomeroy, with 21 years of Lago service, started as a draftsman in TSD-Engineering in April, 1937, and also worked as equipment inspector and designer. He transferred to Mechanical-Administration in July, 1952, as an engineer, and became foreman-Yard in November, 1956. Both retired Aug. 1.

Old Commissary Cards Expire Aug. 16

After Aug. 16, old Commissary identification cards will no longer be valid for shopping in the Lago Commissary. Applications for new cards can be picked up at the Commissary, and since approximately two weeks are required to process applications, there is not much time left for applicants.

Beginning Aug. 18, only persons holding new cards will be permitted to shop.

Fls. 1825

59 Employees Coined Ideas Last Month; Two For Fls. 75

P. Storey, Mechanical-Yard, and R. R. Hazel, of Mechanical-Garage & Transportation, each received a check of Fls. 75 from the CYI office for their accepted ideas. Mr. Storey's idea, to install a pumpout connection on the upper part of the catalyst line, and Mr. Hazel's, to weld an extension to the rear hoist in the main garage shop, were the big winners of the month. V. A. Mondinho, Process-Cracking, was next with a Fls. 60 award, and L. B. Hunt, Mechanical-Metal Trades, had a Fls. 50 award.

June's total of Fls. 1825 increased the year's CYI payments to Fls. 12,915, an average disbursement of Fls. 2000 per month.

The complete June list follows:

Cartwright, superintendente di schoolnan, C. S. Bartholomew, director, y David Skeath, presidente di e klas cu ta gradua e anja aki.

Mideast and Oil Still in News

News of events in the Middle East in the past two or three weeks has thrown the Western world into a turmoil of questions, uncertainties, and problems as yet unsolved. World politics and oil economics, represented by huge investments and large supplies, are intertwined as the Middle East nations strive to settle their own problems.

Howard Page, a director of Jersey Standard and a Middle East expert, said in commenting on developments, "significant as the Middle Eastern events are for members of the oil industry, it must be recognized that they are primarily political. Despite this fact effort has been made by the Communists and their fellow-travelers to confuse the issues by reference to oil. For example, the Russians said 'the real reason for armed United States intervention in Lebanon is the desire of the oil monopolies of the U. S. A. and other Western powers to retain their colonialist hold on the Mideast countries.'"

In denying this charge, Mr. Page admitted that "while it would be unrealistic to assume that questions of oil supply to Western Europe and countries east of Suez have not entered into the consultations of the Western governments, the Russian statement is wrong on three counts: none of the large oil companies of the West has a monopoly; no colonialist hold exists today in any Middle East Country, and certainly not, Jersey, nor I am sure, any other oil company has sought to influence

our government's action in this matter, nor were we consulted."

This view was given support by the New York Times, which said in an editorial "The United States did not go into Lebanon to 'protect the oil interests.' It did take action in the interest of that larger stability which is vital to the whole world."

Mr. Page mentioned that the new Iraq government has pledged itself to abide by agreements with the Iraq Petroleum Corporation, and that there has been no interruption in the flow of oil from Iraq.

Production Vital

"It should be kept in mind," he said, "that continued production of oil is tremendously vital to all Middle Eastern countries, no matter what government may be power in any of them at a given time. If the leaders of these countries wish to improve the living standards of the people, which they profess to be their aim, they must rely heavily on the principal resource of the region, oil. Iraq, for example, receives more than half of its government revenue

from oil operations.

"While Middle East oil is important to Europe (which receives about 70 per cent of its supplies from that area), the markets of Europe are also important to the people of the Middle East. There is mutual advantage to this trade relationship. What the oil companies have done in the Middle East is to provide under freely arrived at agreements the capital and technical skills for oil development. They have also provided means for marketing oil, without which the oil would do the Middle East nations little good."

But, said the Jersey expert, even in the event of such political turmoil in the region as would result in interruption of oil shipments from some of these sources, Jersey is in a good position to maintain deliveries because of the wide geographic diversity of Jersey sources of supply. Jersey's share of Iraq oil this year has amounted to 3.4 per cent of all Jersey production, and Jersey's entire Mideast production came to about 20 per cent of its total worldwide production. Also the conditions facing the industry in such an event would be potentially easier than at the time the Suez Canal was closed, because there is at present a spare producing capacity of more than 4 million barrels per day in the Western hemisphere.

Aug. 16 Fecha Final pa Carchinan Bieuw

Despues di Aug. 16, carchinan bieuw di comisario lo no ta valido mas pa haci compras na Lago Commissary. Aplicacionnan pa carchi nobo por worde busca na Comisario, y como tin mester dimas di menos dos siman pa trata cada aplicacion, no ta resta mucho tempo pa aplicantenan.

Cumizando Aug. 18, solamente personanan cu carchi nobo lo worde permiti pa haci compras.

Ehecutivo di Esso ta Nenga Cargonan Anti-Trust Federal

Den un carta reciente na empleadonan di Esso Standard, William Naden, vice presidente ehecutivo, a bisa cu cargonan haci door di e grand jury Federal cu Esso Standard a conspira cu otro companianan di azeta pa aumenta y fiha prijsnan ta "completamente sin fondo." E carta a worde scirbi na empleadonan recientemente pa splica con e cargonan a resulta.

Expresando confianza sin reserva cu Esso no a viola ningun leyman antitrust y lo worde huzga inocente, Sr. Naden a surgi empleadonan pa reflicha e mes confianza den contactonan cu amigo y bicinjanan. El a agrega cu "nos lo trata pa hiba e caso aki raad mas pronto posible pa efectua nos completo vindicacion."

Ariba Mei 29, Standard Oil Company (New Jersey) y tres di su afiliadonan, incluyendo Esso Standard, a worde acusa door di un Federal grand jury na Alexandria, Va., di a conspira cu binti-cinco otro compania pa hiza y fiha prijs di gasoline anja pasa.

E cargonan ta relaciona cu e hecho cu na principio di 1957, e prijs di gasoline tambe a subi.

"E aumento den prijs di crudo, Sr. Naden a bisa, "a bini despues di cuatro anja di costonan di produccion montando continuamente staal, trabao, y otro materialnan sin un aumento correspondiente den prijs cu un productor por haya pa su azeta crudo. Consecuentemente, na Januari 1957, cierto cumpradornan domesticos a aumenta nan prijs di oferta pa azeta crudo. E ultimo aumento den azeta crudo tabata na 1953."

Cerramento di Canal un Factor

Un otro factor cu a contribui, el a bisa, tabata e aumento tremendo den demanda pa azeta crudo na Estado Unidos, cual a resulta ora Egipto a podera di e canal di Suez. Esaki a reduci considerablemente e recibo di azeta door di Europa for di Mediano Oriente, y companianan petrolero di Estados Unidos a worde urgi door di gobierno federal pa entrega cargonan vitalmente necesario den Europa liber. "Esso," el a mustra, "a bai un distancia extraordinariamente grandi pa haya e entregonan necesario."

Sr. Naden tambe a splica e aumento di gasoline den invierno di 1957. Esso Standard ta compra tur su crudo na e prijs coriente di mercado, el a splica. "Loke nos ta paga pa crudo ta e factor grandi den nos costonan y ponemento di prijs. Pa asegura nos furnicion di crudo den un mercado subiendo, nos a haya necesario pa aumenta nos prijs pa e crudo cu

nos tabata cumpra. E aumento aki tabata alcanza un promedio di mas of menos 37 cents pa barril. Nos no por a absorba e gasto aki; pesey nos a hiza prijsnan di nos productionnan un cent pa galon," Sr. Naden a splica. El a acentua cu esaki tabata net mas of menos bastante pa recubri e costonan mas halto di Esso Standard.

"E aumento ey," el a nota, "no a wanta pa mas cu un luna. Segun companianan di azeta tabata bringa pa bende, competicion a forza prijsnan abao y nan a keda abao for di e dia."

Sr. Naden a splica cu formalidadnan preliminar di ley probablemente lo tuma e resto di verano Despues di esey, Esso Standard, confidente di su inocencia, lo trata pa trece e caso dilanti raad mas pronto posible, el a bisa.

Frequency High For July Rains

Aruba was blessed with rain practically every other day during the first three weeks in July when measurable amounts fell 14 days out of 23.

By July 23 a total of .632 inches of rain had fallen. Although more precipitation occurred in June, 1.563 inches, measurable amounts were recorded on only seven days of that month. The total rainfall for June and up to July 23 nearly equaled the "deluge" in April and May. A total of 2.195 inches was measured during the last two months compared to April-May rainfall of 2.457.

Most of the April-May rain, which ended the near drought conditions of the first three months of 1958, fell in four "heavy" showers. Prior to April 29, only .035 inches of rain had fallen and the government was forced to take measures to reduce water consumption.

The best "rainy day" in July was the 19th with .142 inches while the wettest day so far this year was May 3. On that day an earth-drenching 2.03 inches relieved the island's water situation. The total rainfall for 1958, as of July 23, was 4.657 inches.

In Court Action

Esso Executive Denies Federal Anti-Trust Charges

In a recent letter to Esso Standard employees, William Naden, executive vice-president, said the charges made by the Federal grand jury that Esso Standard conspired with other oil companies to raise and fix prices are "completely unfounded." The letter was written to employees recently to explain how the charges had come about.

Expressing unqualified confidence that Esso has not violated any anti-trust laws and would be proved innocent, Mr. Naden urged employees to reflect this same confidence in contacts with friends and neighbors. He added that "we will try to bring this case to trial at the earliest possible date to bring about our full vindication."

On May 29, Standard Oil Company (New Jersey) and three of its affiliates, including Esso Standard, were accused by a Federal grand jury in Alexandria, Va., of conspiring with twenty-five other companies to raise and fix gasoline prices last year.

The charges are related to the fact that in early 1957, the price of gasoline also went up.

"The rise in the price of crude oil," Mr. Naden said, "came after four years of constantly increasing production costs—steel, labor, and other materials—without a corresponding rise in the price a producer could get for his crude oil. Consequently, in January, 1957, certain

domestic purchasers raised their offering price for crude oil. The last increase in crude oil prices had been in 1953."

Canal Closing a Factor

Another factor that contributed, he said, was the tremendously increased demand for crude oil in the U. S. that came about when Egypt seized the Suez Canal. This sharply cut down Europe's supply of oil from the Middle East, and U. S. oil companies were urged by the Federal Government to make up supplies badly needed in Free Europe. "Esso," he pointed out, "went to extraordinary lengths to find these needed supplies."

Mr. Naden also explained the rise of gasoline in the winter of 1957. Esso Standard buys all of its crude oil at the going market price, he pointed out. "What we pay for crude oil is the big factor in our costs and pricing. To insure our supply of crude oil in a rising market, we found it necessary to raise our offering price for the crude we purchased. This increase averaged about thirty-seven cents a barrel. We could not absorb this added out-of-pocket expense; we therefore raised our product prices about one cent a gallon," Mr. Naden explained. He emphasized that this was just about enough to recover Esso Standard's increased costs.

"That increase," he noted, "did not hold up for more than a month or so. As oil companies fought for business, competition forced prices back down and they have stayed down there ever since."

Mr. Naden pointed out that preliminary legal formalities will probably take up the balance of the summer. "After that, 'Esso Standard,' confident of its innocence, will try to bring the case to trial at the earliest possible date," he said.

DRs Serve Two Years

Pictured on this page are the 31 newly-elected district representatives for the Lago Employee Council who have begun their two-year terms.

Elected to serve nearly 5000 constituents in 29 districts, the representatives were chosen in the final balloting held July 2-3. The initial stage of the elections was the primary conducted on 25-26. Thirty-one are elected for the 29 districts so that the large yard and carpenter-paint crafts can have two represent-

atives from each.

District representatives represent all staff and regular Lago employees except supervisors, confidential administrative employees, and temporary employees. LEC DRs represent their constituents in any grievance concerned with rates of pay, hours of employment, or working conditions. In order to be eligible to run in the biennial elections, the candidates for DR posts must have one year of continuous employment with the company.

E. Oduber District 29 Medical

DRs Lo Sirbi Dos Anja

Ariba e pagina aki tin e retratonan di e 31 representantenan di distrito nobo eligi, kende a caba di principia nan termino di dos anja. Nan ta pertenece na e organizacion di Lago Employee Council.

Eligi pa sirbi casi 5000 constituyente den 29 distrito, e representantenan a worde escogi den eleccion final ariba Juli 2 - 3. E promer parti di e eleccion tabata e primario ariba 25 - 26. Trinta y un ta worde eligi pa e 29 districtonan asina cu e districtonan mas grandi,

yard y carpenter-paint, por tin dos.

Representantenan di distrito ta representa tur empleadonan di Lago excepto supervisornan, empleadonan confidencial administrativo, y empleadonan temporario. DR-nan di LEC ta representa nan constituyente den tur kchonan tocante tarifa di pago, oranan di empleo, oi condicionnan di trabao. Pa ser eligible pa corre den e eleccionnan di cada dos anja, e candidatonan pa puestonan di DR mester tin un anja di empleo continuo cu compania.

Baseball Fever Sweeps Island

SOME POINTERS on safety equipment are given to Little League baseballers at Lone Palm Stadium by Danny Litwhiler, former professional outfielder who has been conducting clinics in Aruba for several weeks.

ALGUN TIP tocante medionan protectivo ta worde duná na hungadornan di Little League na Lone Palm Stadium door di Danny Litwhiler, anteriormente outfielder profesional kende la dunando instruccion di baseball na Aruba durante varios siman.

DANNY GIVES this group of junior baseballers at Lago Sport Park some valuable tips on proper delivery technique. A baseball coach at Florida State University, Danny once played for the Phillies, Cardinals, former Boston Braves and Redlegs.

DANNY TA dunando e grupo di hungadornan junior di baseball na Lago Sport Park algun tip valioso tocante e propio modo di tira. Danny, kende awor ta un baseball coach na Florida State University, un tempo a yega di hunga pa Phillies, Cardinals, e anterior Boston Braves y Redlegs.

Danny Litwhiler, the former outfielder for the Phillies, Cardinals, Braves and Redlegs, is in Aruba for several weeks, conducting baseball clinics in Seroe Colorado and the Lago Sport Park. In the course of these training sessions he gives tips on playing, demonstrates proper methods of catching, pitching, hitting, running and sliding.

During his career he played in two World Series with the Cardinals, in 1943 against the Yankees, and in 1944 against the Browns, and also played in the All-Star Game. In his best year he hit .305 with the Phillies, and ended his career as a player-coach with the Redlegs in 1951. He is now baseball coach at Florida State University.

He took time out to talk on tape for the Aruba Ezzo News, and his conversation touched on all sorts of topics related to baseball. Here, in his own words, is what Danny Litwhiler thinks of Aruba baseball, Casey Stengel, and how a good ballplayer can become a better one.

On Aruba baseball: "The quality of baseball here is about average with any community of comparable size. Players here have the know-how. You get it from playing, but you get it from copying too. There must have been some good players here for boys to copy. You know, kids are great ones for copying. As a matter of fact, I think you play more baseball here per capita than any city in the U. S. There's a lot of baseball played here; and they play pretty good baseball.

"I think you'll pick up a major-leaguer or two out of here; you're bound to, as much baseball as you play. Somebody has to make the grade. How to do it? Well, just by playing baseball. Scouts come over, you know...

"Take the Winter League around here. Some good ballplayers from Aruba will go over to the cities, and they play against Aparicio, Carrasquel, guys like that. So they see him, they like him, they go back to their club and say, 'good ball player down there'; that's the way it happens. We call it bird-dogging. I might see some-body here I like, looks pretty good to me. I could mention him to some club at home, and they'd get in touch with him."

How do you account for the year-in, year-out success of the Yankees, when other teams seem to come and go?

"Well, George Weiss, the general manager, knows baseball as well as anyone. He can pinpoint players over the hill, Maglie and Slaughter, good for one thing. Johnny Mize was washed up in the National League, but Weiss knew he was good for pinch-hitting, and Casey (Stengel) was smart enough to go along with him. Then they have an extensive farm system, they don't have to bring a guy up until he's mature and ready. They have a balanced team right down the line-up, and other teams don't have it; all the Yankees have is good players.

And don't forget the coaches. Stengel has Crosetti and Turner, and it was Bill Dickey who made a great catcher out of Yogi Berra."

Stengel?

"Any manager who can get along with ballplayers can be as successful with the Yankees as Stengel is. Casey's a good manager. He knows how to manage ball players. I tell you, I saw Casey when he managed the Braves, and he was floundering around in the second division. You're only as good as the ball players you have, and Casey's got good ones. He knows how to handle men. They've got all the good players and the other clubs aren't even knocking. Our ball club, the Cardinals—1943, 1944—were just as good as the Yankees.

"Those were happy days with the Cardinals. You were winning every day. We won 106 games one year... the best player I ever saw was Stan Musial. He's been tops for 15 years; started out like a house afire and stayed lit all that time...

On being a better ballplayer:

"Without the right attitude you can never be a good ballplayer. Self discipline is the big thing; you can't fight the manager or the other ballplayers. You have to get along with them.

"You have to have initiative, a real desire to do things—take an extra base; if somebody kicks one. Hustle, put out all the way. You have to take care of yourself; you can't hang around with a bunch of bums and still be a good ballplayer. You'll lose that initiative, because you're just not physically fit.

"To develop this attitude, well, a lot of it's in the coaches. Parents can help. You don't want to be a preacher in this thing; you push too much and they won't pay any attention. It has to be installed in a boy by his parents and his coach. A coach, if he takes his players out has got to say, look, check in at such and such a time. A coach can ruin a young kid on his team without this. One thing you don't do in professional baseball if you're coaching or managing. You don't let the older players run around with the younger ones. Sure, there are a lot of older players who are good for the

(Continued on page 7)

WITH TWO Worlds Series under his belt, able of hitting over .300, Danny can share experience about correct stance at the plate. Here he has the know-how," he says, "get it from playing but you get it from copying too."

ON BEING a better ballplayer, Danny tells the boys, "Without the right attitude, you can't be a good ballplayer. Self discipline is the big thing; you can't fight the manager, ballplayers. You have to get along

DURING THE course of Danny Litwhiler's training sessions at Seroe Colorado and Lone Palm Stadium, the former major-leaguer gave tips on catching, hitting, pitching, running, and sliding as well as his ideas on general baseball strategy.

DURANTE CURSO di e entrenamentonan di Danny Litwhiler na Seroe Colorado y Lone Palm Stadium, e anterior miembro di liganan mayor a duna tip tocante catching, bateo, pitchamento, corremento y slippamento y tambe tocante strategia di baseball en general

THIS CATCHER receives first-hand coaching from Danny on pegging the ball to the infielders. Danny told the boys, "I think you'll pick up a major-leaguer out here; you're bound too, as much baseball as you play." E CATCHER aki ta recibí instruccion di primera mano for di Danny tocante modo di dal e bala den infield.

Beisbol Popular Ariba Isla

Danny Litwhiler, anterior outfielder di Phillies, Cardinals, Braves y Redlegs, ta na Aruba pa varios siman, dunando instruccion den baseball na Seroc Colorado y Lago Sport Park. Den curso di e sesiounan di entrenamento el ta duna tips ariba hungamento, el ta demonstra propio metodonan di catch, pitcha, bati, corre y slip.

Durante su carera el a hunga den dos World Series cu Cardinals, na 1943 contra Yankees, y na 1944 contra Browns. Tambe el a hunga den un wega All-Star. Den su mehor anja el a bati .305 cu Phillies, y el a termina su carera como coach-hungador cu Redlegs na 1951. Awo el ta baseball coach na Florida State University.

El a papia ariba "tape" pa Aruba Esso News, y su conversacion a bai tocante tur topico relaciona cu baseball. Aki, den su mes palabranan, nos tin loke Danny Litwhiler ta pensa di baseball na Aruba, di Casey Stengel, y con un bon hungador por bira mehor.

Tocante baseball na Aruba: "E calidad di baseball aki ta mas of menos cu cualkier comunidad di igual tamanjo. Hungadornan aki tin e saber. Bo ta haye'le for di hungamento, pero bo ta haye'le for di copiamento tambe. En efecto, mi ta kere cu aki nan ta hunga mas baseball por promedio cu na cualkier ciudad di Estados Unidos. Aki nan ta hunga baseball hopi mes; y nan ta hunga'le bon.

"Mi ta kere cu por sali un of dos hungador di liganan grandi for di aki; esey mester por ta posible en vista di e tanto baseball cu ta worde hunga. Algun mester por yega. Con? Wel, djies door di hunga baseball. Scouts ta pasa tur camina, bo sabi...

"Tuma por ehemplo e liga di invierno aki rond. Algun bon hungador for di Aruba por bai pa nan, y anto nan ta hunga contra hombernan manera Aparicio, Carrasquel, y demas. Nan ta mire'le, nan ta guste'le, nan ta bolbe nan club y ta bisa, 'tin bon hungador aya banda'; asina ta socede. Nos ta yama esey 'cazamento di parja.' Por ehemplo mi ta mira un hungador cu mi ta gusta y ta muntra bon. Mi ta menciona esey na mi club y nan ta pone contacto cu ne.

Con bo ta splica e exito di Yankees anja tras anja mientras otro equiponan ta bini y bai?

"Wel, George Weiss, e gerente general, conoce baseball. El sabi mes ora si e hungadornan a yega na fin. Por ehemplo, Maglie y Slaughter, cu ta bon pa un solo cos. Johnny Mize a yega na su fin den National League, pero Weiss tabata sabi cu el tabata bon pa pinch-hitting, y Casey (Stengel) tabata asina huicioso di combinari cu ne. Tambe nan tin un farm system masha grandi; nan no tin nodi trece un hungador ariba te ora e ta completamente cla. Nan tin un equipo bon balanza, y otro equipo no ta esey; tur loke Yankees tin ta bon hungador.

"Y no lubida e coachnan. Stengel tin Crosetti y Turner, y tabata Bill Dickey kende a haci Yogi Berra un gran catcher."

Stengel?

"Cualkier manager cu por sali bon cu hungadornan por tin mes tanto exito cu Yankees manera Stengel. Casey ta un bon manager; el sabi con mancha hungadornan. Mi por bisa bo, mi a mira Casey tempo cu el tabata manager di Braves, y el tabata na segunda lugar den e division. Bo ta mes bon cu e hungadornan cu bo tin, y Casey tin bon hungador. El sabi con trata cu nan. Nan tin tur e bon hungadornan y e otro clubnan no ta yega ni cerca di nan. Nos club, Cardinals — 1943, 1944 — tabata mes bon cu Yankees.

"Esey tabata temponan bon cu Cardinals. Bo tabata gana tur dia. Un anja nos a gana 106 wega. E mehor hungador cu mi a yega di mira tabata Stan Musial. El ta na cabez ya ta 15 anja; el a cuminsa manera un furor y el a keda asina semper...

Pa ser un mehor hungador:

"Sin e actitud corecto nunca bo por ta un bon hungador. Disciplina propio ta e cos grandi; bo no por bringa cu e manager of otro hungadornan. Bo mester sali bon cu nan.

"Bo mester tin iniciativa, un berdadero deseo pa haci cos — coi un base extra si un hende dal un. Haci tur bo esfuerzo posible. Bo mester cuida bo mes; bo no por ta semper den compania di un grupo di haragan y ainda ser un bon hungador. E ora bo ta perde e iniciativa, pasobra fisicamente bo no ta capaz.

"Pa desaroya e actitud aki, wel, hopi di dje ta keda na e coachnan. Mayornan por yuda. Bo no mester ta un predicador di e cos aki; si bo pusha mucho, nan no ta paga tino. Esaki mester worde hincá den un hoben door di su mayornan y door di e coach. Un coach, si el ta sali cu su hungadornan, mester por bisa, tendi aki, pa tal y tal ora boso mester bolbe. Sin e disciplina aki un coach por ruina un hungador hoben den su equipo. Un cos cu bo no ta haci den baseball profesional si bo ta coach of manager. Bo no

(Continuación na pagina 7)

"YOU HAVE to have initiative, a real desire to do things," Danny told the boys. "Hustle."

"BO MESTER tin iniciativa, un berdadero deseo pa haci cos," Danny a bisa a muchanan. "Hustle."

"TO DEVELOP this thing... coaches... and parents can help. You push too much and the boy won't pay attention. It has to be instilled in a boy by his parents."

"PA DESAROYA e cos aki coachnan y mayornan por yuda. Si bo pusha di mas e mucha no ta paga atencion. E mester worde hincá den e mucha door di coach.

"YOU HAVE to take care of yourself; you can't hang around with a bunch of bums and still be a good ball-player. You'll lose that initiative."

"BO MESTER percura pa bo mes; bo no por ta den compania di un grupo di haragan y ainda ser un bon hungador. Bo ta perde iniciativa."

A SEROC Colorado Little Leaguer beats the throw to first in plenty of time as the boys play a game under Coach Litwhiler's careful scrutiny.

UN HUNGADOR di Little League di Seroc Colorado ta gana e tirada pa primera comodamente mientras e muchanan ta hunga un wega bao vista di Coach Litwhiler.

"THERE'S A lot of baseball played here; and they play pretty good baseball. Baseball in Aruba is very promising I think. Where you have quantity, quality will develop."

"AKI NAN ta hunga hopi baseball; y nan ta hunga bon baseball. Baseball na Aruba ta masha promitente, mi ta kere. Unda cu bo tin cantidad, calidad lo desaroya."

CU DOS World Series den su record y eapaz pa bati .300, Danny por papia cu experiencia tocante e posicion corecto na e plachi. "Hungadornan aki tin bon conocimiento," el a bisa, "y bo ta haye'le for di hungamento, pero bo ta haye'le for di copiamento tambe."

PA SER un mehor hungador, Danny a bisa e muchanan, "Sin e actitud corecto, nunca bo por ta un bon hungador. Disciplina propio ta e mehor cos; bo no por bringa cu e manager of otro hungadornan. Bo mester por sali bon cu nan."

GIVES a future "big-leaguer" confidence in his equipment by demonstrating the effective stopping power of his catcher's mask.

TA duna un futuro miembro di "liga mayor" con su medionan protectivo door di demonstra e efectividad di e mascara di e catcher pa para golpe.

Boys and Girls Page

Today's Slang Expressions Go Back To Middle Ages

So you think you're using the latest in slang phrases when you say something like, "Nuts to you!" Well, you are really being old-fashioned, for the saying originated long ago.

Young men in olden days went calling on their best girls, just as now, but they had to decide how well their attentions were being received by what the girl served them in the way of food.

Various dishes meant certain things. But everyone knew that a plate of nuts offered by a girl to a man caller meant a definite "No." Hence the saying, "To you, nuts."

In the time of the famous Black Prince, all princes and noblemen went to great expense to import fine feathers to adorn their hats. Then someone suggested using small feathers to decorate soldiers who

Though it was harsh and inefficient by modern standards, it was highly prized in times when all cleaning aids were scarce and expensive.

So it became the practice for a person wanting a favor from some public official to pave the way with a gift of homemade soap. And because of this, "soft soap," eventually came to mean any form of wheedling flattery.

Perhaps one of the most interesting terms handed down by the ancients was the one concerning the sowing of "wild oats."

Saxons planted oats early in English history. But they soon found out that if the grain was neglected it quickly reverted to its wild state, and then the seed from it was practically useless.

Seed from wild oats produced thick blades, but light heads.

It was foolish and wasteful to sow such seed, but old folks couldn't convince the youngsters of this. So if a youth wished to try a crop of wild oats, he might just as well learn by experience, they said.

So the phrase eventually came to mean youthful folly.

had shown unusual courage and bravery.

In later years, when a person won an honor of any type, he was likely to refer to it as a feather in his cap.

During the Middle Ages horses were used for everything - farming, transportation, battles and knightly tournaments. Any animal that was much larger than ordinary was reserved for royalty and the very rich, and was called a "great horse" or "high horse."

Eventually, pride and arrogance came to be associated with such mounts. Now "to get on a high horse" means giving a display of haughtiness.

It was before the seventeenth century that English housewives learned to combine waste fats and potash into a semi-liquid soap.

Hopi Biaha Heridá

Antiguo Hungadornan di Baseball Tabata Hombernan Duro

Den baseball, mescos cu den tur otro actividadnan nacional, no tur e heroenan ta sali den e storianan den corant.

Algun di e hombernan cu a haci mas tanto pa tene baseball na bida y crecien de a paga cu sanger y dolor pa haci asina.

E mehor catchers, por ehemplo, a paga cu nan djente pa tene baseball na bida. Hopi tempo largo equiponan viajante di baseball tabata camna cu mas catchers cu pitchers. Masha poco catchers por a wanta cuatro anja den baseball si n perde mayoria di nan djente.

Den e promer dianan di baseball no tabata un vista strango pa mira un catcher pará tras di e plachi cu sanger ta corre for di su boca. Cada wega tabata en efecto un test di duradez pa e nueve hombernan cu ta-

bata hunga, y esey ta debi na e regla cu no por cambia hungador. Si un homber haya golpe of no por sigui hunga, su equipo mester a sigui sin ne.

Na promer, bistimento di handschoen pa protega mannan tabata worde considerá un senjal di debilidad. Maske e baseball oficial a bira mas y mas duro pa mancha, e promer hungadornan di baseball a nenga pa bisti handschoen.

Asina grandi tabata e sentimento publico y privado tocante e capacidad pa trata cu e bala manera un homber cu e promer handschoennan di baseball tabata color di carni.

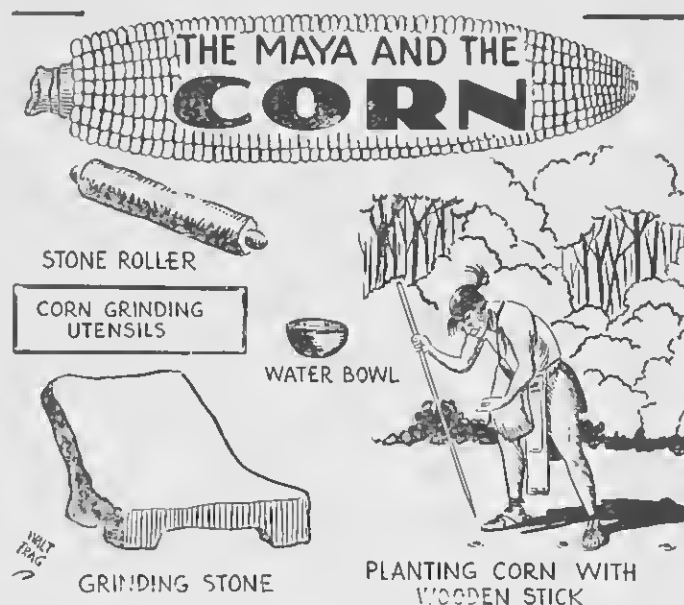

Pitchers tambe mester tabata hombernan di gran duradez. E bateadornan tabatin derecho pa grita si nan kier un bala halto of un abao. Tabata tuma nueve bala pa bolia un bateador den e dianan ey.

Pitchamento for di laria tabata ilegal. E bala mester a worde tirá cu braza for di banda. Tabata nada pa un pitcher pitcha binti te cuarenta wega, un mes ora tras di otro.

E promer hungadornan di baseball tabata hunga pa puro smaak di e wega. Hungamento di baseball pa placa tabata worde considerá un cos immoral y malo.

E promer hungadornan di baseball cu en berdad tabata worde pagá pa nan servicionan no tabata permiti pa biba hunto cu resto di e equipo. Nombernan di tur e heroenan desconoci, sin kende baseball manera nos conocele awor, probablemente no ta existi, a bai pa semper.

Pero e pasatempo nacional cu nan tabata stima a bira grandi.

Ancient Mayas Knew Everything Except How To Grow Wheat

It's hard to imagine a world without wheat. But the ancient Indians of the New World had never heard of it.

They lived on corn, or maize.

Fifteen hundred years ago in Mexico and the northern part of Central America, the Maya empire was one of the most advanced civilizations in the world. Their knowledge of the stars was probably greater than that of any other country. Their buildings were among the world's largest.

So we are amazed that such a people had practically no knowledge of proper farming methods.

To plant corn they first cleared the forest. The trees were ringed with a stone axe to kill them. When dry, they were burned. Then, when the rains came in May, everything

was ready for planting.

The Maya had no work animals and all their gardening was done by hand. Their only tool was a wooden planting stick.

The first year they got a fairly good crop, the second year about two-thirds as much, the third year about one-third as much. No weeding was done.

The fourth year the Mayan farmer would burn more forest to start another patch. And in from three to ten year's time, the trees on the first patch would be grown up, ready for burning again.

But after burning had been carried on for many years, the trees would fail to come up. No more corn could be grown on the land. Scientists estimate that after about 1,000 years of occupation the whole area had become a grassy plain. That meant there was no land left which could grow corn.

The Maya knew nothing about fertilizing the soil. And if they had no corn to eat, they would starve.

So they moved northward, leaving behind them forever the cities which had taken them hundreds of years to build.

BG Pen Pal Club Seeks Recruits

An international pen pal club, with headquarters in British Guiana, is seeking letter-writing members from Aruba, according to a recent request received by the Esso News.

Members from time to time will be sent free books and magazines by the Club, and exchange of stamps among stamp-collectors is also promised. The group was started some years ago by Anthony Gonsalves for pen pals in British Guiana only. Members have now decided to open the club to members from Caribbean islands.

Further information concerning membership and dues can be had by writing:

Maya no Por A Soluciona Problema di Suelo

Ta duro pa imagina un mundo sin trigo. Pero e antiguo Indianan di Mundo Nobo nunca a tende di dje.

Nan tabata biba di maishi.

Diez-cien anja pasá na Mexico den parti norte di Centro-América, e imperio di Maya tabata un di e civilizacionnan mas avanza di mundo. Nan conocimiento di streanan tabata mas grandi cu di cualkier otro país. Nan edificionan tabata entre esnan di mas grandi. Pesey ta strango cu e hendenan aki practicamente no tabatin idea di propio medionan di agricultura.

Pa planta maishi nan tabata limpia e mondi promer. E matanan tabata worde rondoná cu piedra pa mata nan. Ora nan seca, tabata kima nan. Anto, ora awacero bini na luna di Mei tur cos tabata cla pa planta.

E Mayanan no tabatin animal di trabao y nan tabata haci tur cos cu man. Nan unico herment tabata un palo di planta. E promer anja nan tabata haya un bon cosecha, di dos anja como dos tercera parti di dje, di tres como un tercera parti. Nan no tabata corta yerba shimaron.

Di cuatro anja nan tabata kima mas mondi pa cuminda un otro pida terreno. Y den tres te diez anja e matanan ariba e promer parti lo a crece asina tanto atrobe cu nan ta cla pa bolbe kima.

Pero despues di varios kinamento, e matanan no ta crece mas. Anto maishi no ta crece mas ey riba. Hendenan di ciencia ta calcula cu despues di mas of menos 100 anja di ocupacion henter e terreno a bira yerba. Esey ta nifica cu no a keda terreno pa crece maishi.

E Mayanan no tabata sabi nada tocante fertilizacion di terreno. Si nan no tabatin maishi pa come, nan lo muri.

Pesey nan a move pa nord, lagando tras di nan pa semper e ciudadnan cu a tuma nan varios cientos di anja pa traha.

HOW TO MAKE A FISHING LINE

1. FIND A POLE (BAMBOO, MAPLE, BIRCH) ABOUT 6 OR 7 FEET LONG.

2. BUY ABOUT 70 FEET OF FISH LINE, 3 OR 4 INCHES IN DIAMETER.

3. THREAD LINE THROUGH CENTER OF CORK WITH A LARGE NEEDLE. TIE HOOK AT END OF LINE.

4. CLAMP SINKER ABOUT 1 1/2 FEET FROM HOOK. TIE A LOOP UNDER SINKER TO KEEP IT FROM SLIPPING DOWN.

5. FIX CORK ON LINE SO IT WILL ALLOW HOOK TO HANG JUST ABOVE BOTTOM.

6. BAIT HOOK SO IT LOOKS NATURAL WITH A GRASSHOPPER WORM OR A FISH EGG.

Mediano Oriente Y Azeta Den Noticia

Noticia di eventonan den Mediano Oriente den e pasado dos of tres siman a benta mundo occidental den un remolino di pregunta, incertidumbre, y problemanan ainda sin solucion. Politica mundial y economia petrolero, representá door di inverticion grandi y produccion enorme, ta worde mezcla un den otro segun e nacionnan di Mediano Oriente ta lucha pa aregla nan mes problema-

nan. Howard Page, un director di Jersey Standard y un experto di Mediano Oriente, a bisa comentando ariba e desaroyonan, "significante manera e eventonan di Mediano Oriente ta pa miembronan di industria petrolero, mester worde reconoci cu na promer lugar nan ta politico. No obstante esaki esfuerzo a worde haci door di Comunistanan y nan socionan pa confundi e asunto haciendo referencia na azeta. Por ehemplo, Rusianonan a bisa cu 'e berdadero motibo pa intervencion di Estados Unidos na Lebanon ta deseo di e monopolionan di azeta di Estados Unidos y otro potencionan occidental pa retene nan poder colonialista ariba e paisnan di Mediano Oriente.'"

Nengando e acusacion aki, Sr. Page a admiti cu "mientras ta irrealistico pa supone cu cuestionnan di entrego di azeta na Europa Occidental y paisnan oost di Suez no a drenta den e consultacionnan di e gobiernonan oriental, e declaracion Ruso ta robez ariba tres punto: ningu di e companianan grandi di azeta di occidente tin un monopolio; no ta existi ningun poder colonialista

awor den eualquier pais di Mediano Oriente, y seguramente no Jersey, ni, ni tin sigur, ningun otro compania di azeta a busca di influencia accion di nos gobierno den e asunto aki, ni tampoco nos a worde consultá."

E punto di vista aki a worde sosteni door di New York Times, cual a bisa den un editorial "Estados Unidos no a bai Lebanon pa 'protega e interesnan di azeta.' El a tuma accion na interes di estabilidad mas grandi cual ta vital pa henter mundo."

Sr. Page a menciona cu e gobiernu nobo di Iraq a comprometi su mes di observa e combenionan cu Iraq Petroleum Corporation, y cu no tabatin intersupcion den e corida di azeta for di Iraq.

"Mester tene na tino," el a bisa, "cu produccion continuo di azeta ta tremendamente vital pa tur paisnan di Mediano Oriente, irrespecto di e clase di gobierno na poder na cualkier momento. Si e lidernan di e paisnan aki ta desea di mehora e standardnan di bida di e hendenan, toke nan ta profesa como nan intento, anto nan mester confia hopi ariba e fuente principal di e region,

azeta. Iraq, por ehemplo, ta recibí mas cu mitar di su entrada di gobierno for di operacionnan di azeta.

"Mientras azeta di Mediano Oriente ta importante pa Europa (cual ta recibí como 70 por ciento di su entregonan for di e lugar aki), e mercadonan di Europa tambe ta importante pa e hendenan di Mediano Oriente. Tin ventaha mutuo den e relacion aki. Loke e companianan di azeta a haci den Mediano Oriente ta furni bao combenionan voluntario e capital y saber tecnico pa desaroyo di azeta. Tambe nan a furni medianan pa vende azeta. Sin cual e azeta lo a haci muy poco bondad na e nacionnan di Mediano Oriente."

Pero, e experto di Jersey a bisa, hasta den evento di tal remolino politico den e region cu por resulta den interrupcion di entregonan di azeta for di algun di e fuentenan aki, Jersey ta den un bon posicion pa mantene entregonan pa motibo di e diversidad geografico di e fuentenan di Jersey. E porcion di Jersey for di azeta di Iraq e anja aki a suma na 3.4 por ciento di henter e produccion di Jersey, y henter e produccion di Mediano Oriente di Jersey a yega na mas of menos 20% di su produccion mundial total. Tambe e condicionnan enfrentando e industria den un tal caso lo ta mucho mas facil cu tempo Suez Canal a worde cerrá, pasobra actualmente tin un capacidad di produccion di spare di mas cu 4 milion barril pa dia den hemisferio Occidental."

Beisbol Popular Ariba Isla

(Continuación di pagina 5)

ta laga hungadornan mas bieuw mucho den compania di esnan mas jong. Seguramente, tin un catndad di hungadornan bieuw cu ta beneficioso pa nan, pero tambe tin un cantidad cu ta ruina nan.

"Tuma un coach ariba e isla aki. Supone cu ariba un viaje pa Curacao e coach mester hiba e bon hungador hoben ey y tene'le hunto cu ne. No lage'le bai. Bise'le pakiko.

"Pa adelanta den baseball, un hoben mester di oportunidad, bon coaching, actitud y habilidad. E cos mas grandi ta pa hunga. Bo no por ta un bon hungador si bo ta hunga un vez pa siman sol. Bo mester hunga dos, tres, cuatro biaha pa siman, y hopi. Mi ta kere cu bo mester ta ariba terreno di bata cuatro vez pa siman a lo menos si bo kier ta un bon hungador.

"Baseball na Aruba ta masha promitente, mi ta kere. Nan ta hunga hopi aki, y unda tin cantidad di mes lo oini calidad. Mi ta segur di esey."

HIS HONOR Eric Arends, acting lieutenant governor of Aruba, opens the YMCA softball league with a sizzling pitch across the plate. Watching at right is Ralph Papa, Y secretary.

HONORABLE SR. Eric Arends, gezaghebber temporario di Aruba, ta habri e liga di softball cu un bon pitebeo over di e plachi. Mirando na banda dreechi ta Ralph Papa, secretario di YMCA.

YMCA Softball Play Opens in Two Leagues

Although six games were scheduled in the Aruba YMCA Softball League during the week of July 20-26, only five contests were official because of a "no contest" ruling on the Don Bosco A's vs. Oranjeboom Jrs. game.

Results of the five games played were:

Caribbean League

Cardinals 10 Parkietenbos Boys 4
Marlboro 13 Lucky Strike 3

National League

Three Stone Jrs. 6 High Life Jrs. 3
Rio Boys 7 West End Boys 5
Don Bosco B's 12 Giants 4

League Standings as of July 26

Caribbean League

	Wins	Losses
Don Bosco A's	1	0
Oranjeboom Jrs.	1	0
Marlboro	2	1
Parkietenbos Boys	1	1
Cardinals	1	1
Bordo Boys	0	1
Lucky Strike	0	2

National League

	Wins	Losses
Rio Boys	2	0
Don Bosco B's	1	0
Dodgers	1	0
Three Stone Jrs.	1	1
High Life Jrs.	1	1
West End Boys	0	2
Giants	0	2

Litwhiler Talks Baseball

(Continued from page 4)

kinds, but there are a lot who can ruin 'em.

"Take a coach on this island. Suppose on a trip to Curacao, the coach should take that good young ball-player and keep him with him. Don't let him get around. Tell him why.

"To get ahead in baseball, a boy needs opportunity, good coaching, attitude and ability. The big thing is to play. You can't be a good ball-player by playing once a week. You have to play two, three, four times a week, and you have to practice in there too. I think you have to be on the ball field four times a week at least if you want to be a ballplayer.

"Baseball in Aruba is very promising, I think. You play a lot here, and where you have quantity, quality will develop. I'm sure of that."

DISPLAYING GOOD form, a YMCA hitter connects in the opening game of the softball league. Actually, there are two leagues, the National and the Caribbeean, each with seven teams.

MUNSTRANDO BON forma, un bateador di YMCA ta conecta den e promer wega di e liga di softball. En efecto, tin dos liga, Nacional y Caribe, cada un cu siete equipo.

Grace Line's New Santa Rosa Makes First Visit To Aruba

To the accompaniment of ships' whistles, the pulsing rhythms of steel bands and a cheering crowd of more than 2000 enthusiastic people, the Grace Line's majestic new Santa Rosa glided into the Oranjestad Harbor a fortnight ago on her maiden visit to Aruba.

On board the ultra-modern Caribbean cruise ship were a full complement of 300 tourists and the crew of 250 who were escorted into the harbor by a large number of motor and sailing vessels.

The Santa Rosa's successful welcome program was achieved through the joint efforts of the Department of Economic Development in conjunction with the Grace Line agent, Eman Trading Company, and in cooperation with the Chamber of Commerce, Aruba Tourist Commission and Merchants Association.

Among leading Island figures on the official reception committee were Deputy Oscar Henriquez, representing the Netherlands Antilles government; Messrs. De Veer, Chamber of Commerce; Berlinski and Whitfield,

Merchants Association; De Castro, Aruba Tourist Commission; Dr. Tuin and Schotborgh, Department of Economic Development; and Harbor-master Meenhorst.

Tourists Treated to Aruban Cocktails

After the welcome ceremonies, the Santa Rosa's passengers were served Aruban Cocktails—a very special tropical drink of coconut milk and gin—by a bevy of Aruban beauties. With nearly a half day to tour the Island's scenic spots and shop in attractive stores, the tourists were whisked away to varied pleasures in

a fleet of cars supplied by the Aruba Tourist Commission. Both Palm Beach and Babi Ruti were major points of interest for the travelers, as well as shopping centers throughout Aruba.

The Grace Line's new Santa Rosa replaced her namesake on the Caribbean tourist routes on June 26. Though this visit to Aruba was her maiden stop, it was the luxury liner's second cruise out of New York City. The \$25-million-dollar ship is 584 feet long, displaces 20,000 tons and has a cruising speed of 20 knots. She will be joined by her sister ship, the nearly completed Santa Paula, later this year.

Thousands Inspect Ship

Throughout the day at its Oranjestad berth, the Santa Rosa was toured by between five and eight thousand people who got a first-hand glimpse of the ship's ultra-luxurious appointments. They wandered over the La Playa Deck, topside, and through the Club Tropicana, dining room and Caribbean Lounge. The swimming pool, which is the largest outdoor pool afloat, attracted the attention of many of the touring group, as did the Promenade Deck, Sun Deck and richly appointed Balcon Suites. The ship is completely air conditioned.

Captain Welcomes

During the late afternoon, leading Island figures were treated to a cocktail party aboard the Santa Rosa as guests of the Eman Trading Company, representing the Grace Line. They were welcomed aboard by Captain Frank Siwik who has been with the Grace Line for the past 29 years. He was also captain of the old Santa Rosa.

It is hoped by Island officials and merchants that the continuation of this ship's visits here will do much to stimulate plans to make Aruba a major tourist attraction in the Caribbean.

THOUSANDS OF people enhanced the festive occasion of the new Santa Rosa's first stop at Aruba. The 584-foot vessel, which has replaced the old Santa Rosa, was greeted by an enthusiastic crowd of 2000 and the music of two steel bands.

MILES DI hende a aumenta e ocasion festivo di e promer bishita di Santa Rosa na Aruba. E hapor di 584 pia, cual a reemplaza e Santa Rosa bieuw, a worde contra door di un multitud entusiaste di 2000 y e musica di dos steel band.

Santa Rosa Nobo di Grace Line A Haci Promer Bishita Aki

Na acompaña di pitramento di bapor, rytmo bibo di steel bands y un multitud entusiaste di mas cu 2000 hende, e majestoso Santa Rosa nobo di Grace Line a drenta haaf di Oranjestad dos siman pasá ariba su promer bishita na Aruba.

A bordo di e bapor ultra-moderno di cruise den Caribe tabatin un complemento di 300 toerista y e tripulacion di 250 cu a worde escortá den haaf door di un cantidad grandi di boto di motor y di bela.

E programa cu exito di bienvenida pa Santa Rosa a worde obtene door di esfuersonan conjunto di Departamento di Desaroyo Economico den conjuncion cu e agente di Grace Line, Eman Trading Company, y en cooperacion cu e Camara di Comercio, Comision di Toerista y Asociacion di Comerciantenan.

Entre prominente figuranan den e comité oficial di recepcion tabata Deputado Oscar Henriquez, representando gobierno; Srs. De Veer, Camara di Comercio; Berlinski y Whitfield, Asociacion di Comerciantenan; De Castro, Comision di Toerista; Dr. Tuin y Schotborgh, Departamento di Desaroyo Economico; y Havenmeester Meenhorst.

Toeristanan Brindá Cocktail Arubano

Despues di e ceremonianan di bienvenida, pasageronan di Santa Rosa a worde brindá Cocktail Arubano — un bebida masha tropical consistiendo di awa di coco cu jenever — door di mucha muhernan Arubano. Cu casi mitar dia pa bishita e puntonan saliente di e isla y haci compras den tiendanan, e toeristanan a worde hibá na diferente lugar door di un flota di auto furni door di Comision di Toerista. Tanto Palm Beach Club como Babi Ruti tabata centronan di interes pa e viajeronan, y tambe e tiendanan di Aruba.

E Santa Rosa nobo di Grace Line a reemplaza e bapor di e mes nomber riba rutanen di cruise den Caribe ariba 26 di Juni. Aunke e bishita aki na Aruba tabata su promer, tabata di segunda viaje di e bapor luhoso aki desde New York City. E bapor di \$25 milion ta 584 pia largo, ta desplaza 20,000 ton y tin un velocidad di 20 milla. Mas laat den e anja aki lo bini un otro bapor di mes typo acerca, Santa Paula, cu awor ta cerca cla.

Henter dia na haaf di Oranjestad, Santa Rosa a worde bishitá pa un total di entre cinco te ocho mil hende kende a haya un promer vista di e luho di e bapor. Nan a pasa over di e La Playa Deck, ariba, y door di Club Tropical, sala di come y Caribbean Lounge.

BEING GENTLY nudged into her berth at Oranjestad Harbor on her maiden visit to Aruba is the Grace Line's new Santa Rosa, hailed as one of the world's finest pleasure liners.

SIENDO GENTILMENTE pushá na su lugar den haaf di Oranjestad ariba su promer bishita ta e Santa Rosa nobo di Grace Line, cual a worde reconocí como un di e mehor bapornan di pasagero na mundo.
